EDUCATION

MASSACHUSETTS INSTITUTE OF TECHNOLOGY, SLOAN SCHOOL OF MANAGEMENT Cambridge, MA
Master of Business Analytics, Operations Research Center, GPA 4.9/5.0 2023 – 2024

- Coursework: Machine Learning, Analytics Edge, Optimization Methods, Deep Learning, Computer Vision
- ML Project: Utilized NFL dataset of 10,000+ plays to predict the probability of defensive tackles achieving AUC of 88% using Logistic Regression, CART, Random Forest, XGBoost, and Optimal Classification Trees (Python)
- Deep Learning Project: Fine-tuned open-source LLMs (GPT, LLaMa 2, Gemma) for recipe generation (Python)
- Leadership: Vice President MBAn Class '24, Sloan Senate (Nominated & elected by peers to communicate class needs)

SETON HALL UNIVERSITY South Orange, NJ
B.S. in Mathematics and Financial Mathematics, minor in Data Science and Philosophy, GPA 3.96/4.0 2019 – 2023

- Coursework: Real Analysis, Statistical Analysis, Financial Engineering, Text Mining, Data Mining
- Leadership: Co-Chair of Student Activities Board (organized campus events with over 1,000 students attending)
- Teaching Assistant: Co-taught University Life course and served as mentor to 35+ freshmen transitioning to college

TECHNICAL SKILLS

- Python (pandas, NumPy, selenium, scikit-learn), SQL, R, PowerBI, AWS, Jupyter, Julia (JuMP, Gurobi), Tableau, Github

EXPERIENCE

MIT SLOAN | BLUE HEALTH INTELLIGENCE Cambridge, MA
AI Scientist Intern, Capstone Project Feb 2024 – Aug 2024

- Applied open-source AI & LLM models (Phi-3, LLaMa 3, Claude 3.5 Sonnet) to predict medical claims for patients while adhering to data governance standard to ensure data integrity and compliance
- Researched and implemented fine-tuning techniques to enhance custom LLM model performance, resulting in 102% increase in Jaccard Index for most granular ICD and CPT code predictions (Python)
- Partnered with business leaders to validate the value of integrating AI into company strategy and drive innovation

MIT OPERATIONS RESEARCH CENTER Cambridge, MA
Transportation Optimization Research Assistant Sep 2023 – May 2024

- Optimized rideshare routes for up to four requests in real-world scenarios from NYC taxi data of 900+ requests (Julia)
- Developed ride-sharing benchmarks using shareability networks for a demand-responsive microtransit system analysis

MIT SLOAN | LINEAGE LOGISTICS Cambridge, MA
Data Science Intern, Analytics Lab Sep 2023 – Dec 2023

- Analyzed 1.1M+ orders to identify growth areas for warehouses and predicted revenue for new customers, improving accuracy by 40% by gathering requirements and data, analyzing, and extracting insights through validation (Python)
- Collaborated with product, data science, and business partners (VP of Data Science) to bridge the gap between data technology and business needs, aligning model development with business objectives and guiding strategic decisions

SETON HALL UNIVERSITY South Orange, NJ
Data Science Research Assistant to Chair of Finance Department Nov 2022 – May 2023

- Spearheaded web scraping initiative on 1,300+ employment opportunities and 40+ class syllabi and utilized NLP models (n-gram) to identify how well class curriculums compared to job prospects (Python, Selenium)
- Present data and insights to drive informed analytics initiative decision-making (Provost, Dean of Business School)

PRUDENTIAL FINANCIAL Newark, NJ
Actuarial Intern (Individual Life Insurance Modeling) May 2022 – Aug 2022

- Optimized data pipeline for model inputs, reducing runtime from 5 hours to 2 min for actuarial model team (Python)
- Presented interpretable key insights diverse stakeholders (Directors, VPs), adapting the presentations to effectively communicate data to technical and non-technical end users

MILLIMAN Little Falls, NJ
Actuarial Intern (Pension Consulting) May 2021 – Apr 2022

- Automated the calculation of 200+ benefit calculations, reducing runtime from 6 hours to 10 minutes (SQL, VBA)
- Delivered visualization of actuarial pension datasets, passionately converting actionable insights into interpretable narratives for clients, effectively using storytelling to communicate analytical results for business decision (PowerBI)

ADDITIONAL INFORMATION

- Interests: Rediscovering music (streaming Lauryn Hill, Beatles, and Amy Winehouse!), trivia, and sunset walks
